

Connecting to your Student Website Using WebDAV in Mac OSX

1. Click "Go" in the Finder menu bar and select "Connect to Server".

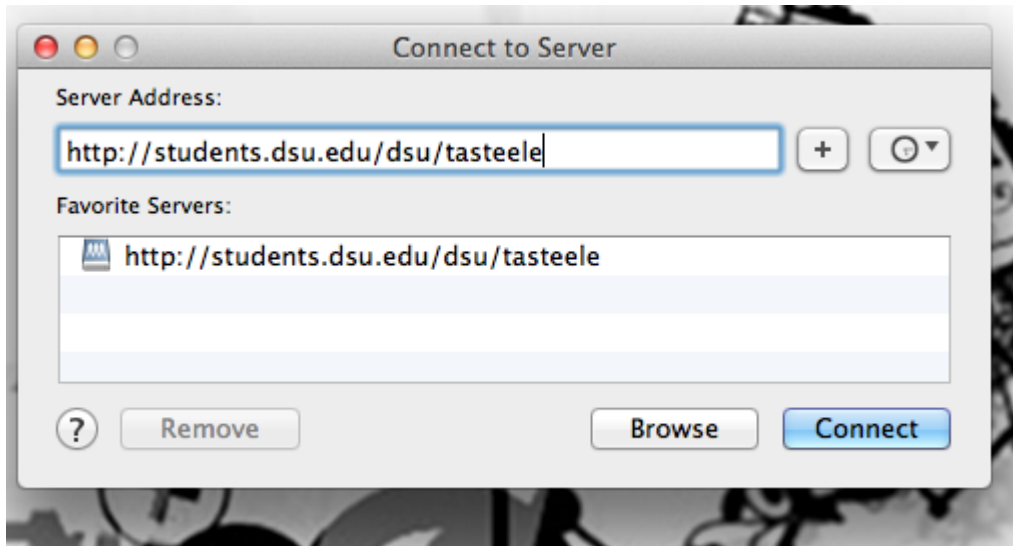

2. Type in your student website address. If you are unsure of your website address, visit

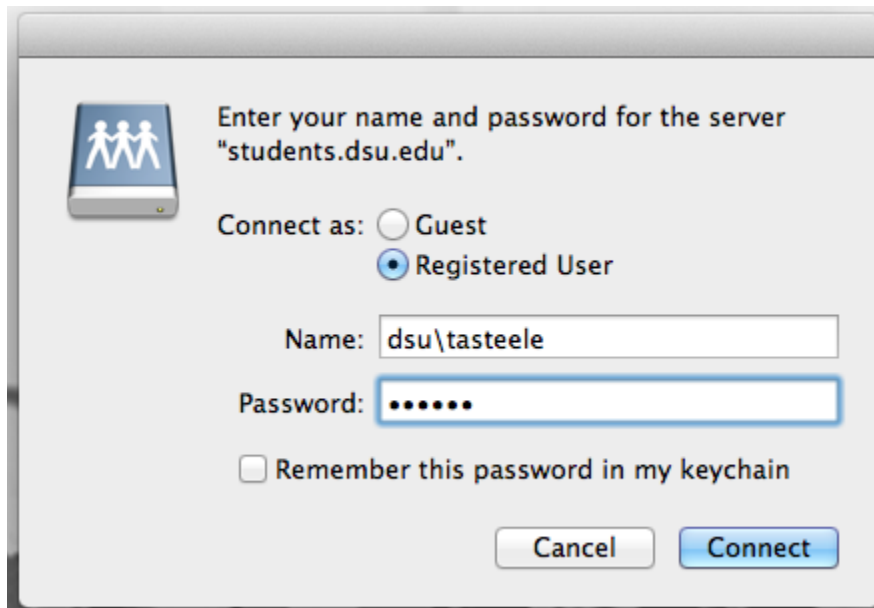

<http://students.dsu.edu/WhatIsMyWebAddress.htm>

Connecting to your Student Website Using WebDAV in Mac OSX

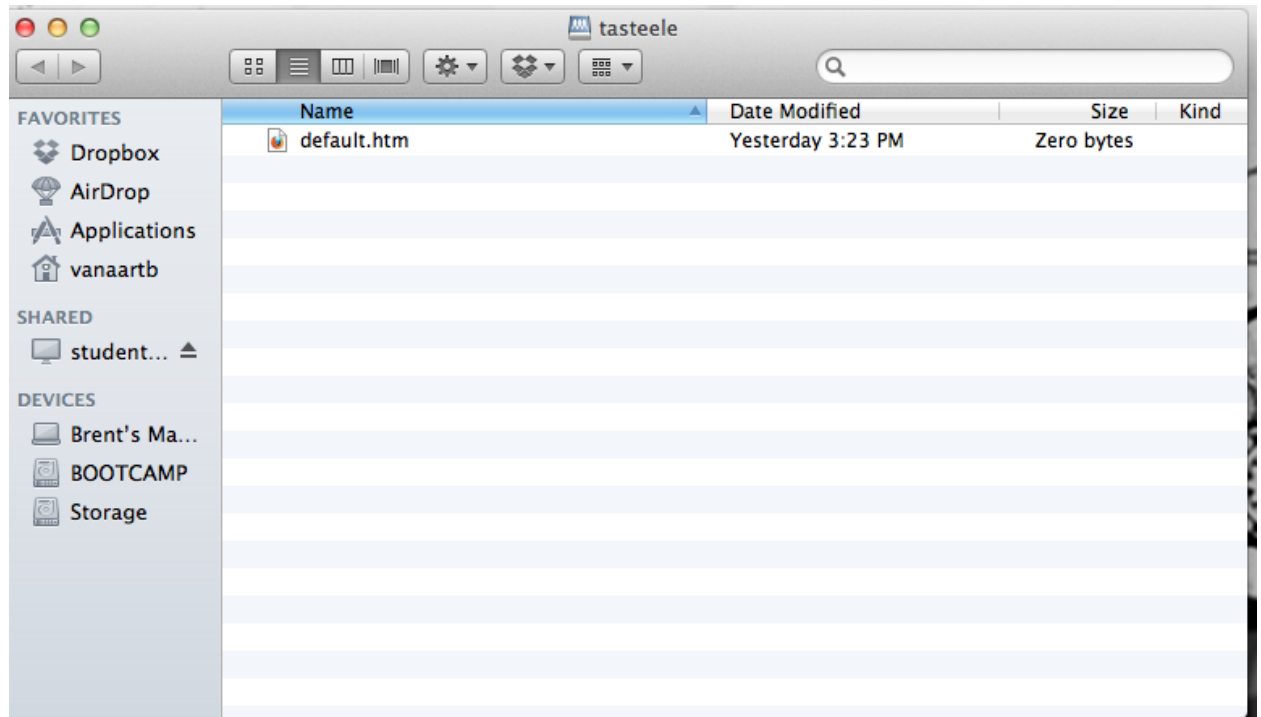

- Click the plus sign next to the server address text box to add the site to your favorites. You should now see it listed below. Click Connect.

- When the login box appears, type in your login credentials and click Connect. If you are unsure what your login credentials are, visit <http://students.dsu.edu/WhatIsMyLogin.htm>

6. Congratulations, you are now connected to your student website. You should now be able to add, remove, and modify the contents of your website.

**Note – It is recommended that you edit a local copy of your website and then transfer the edited files to the student web server once you are finished editing.*
